EDUCATION

Singapore Polytechnic Singapore

Diploma in Applied AI & Analytics; CGPA 3.83 / 4.00 *Apr 2024 - Apr 2027 (expected)*

- Director's Honour Roll AY25/26; top 5% in Deep Learning, Practical AI, DevOps for AI

EXPERIENCE

Founder & Sole Engineer Sep 2026 - Present

Reyolk (reyolk.app) | Agentic AI, LLM Agents, LLM Evaluation, AI Security *Singapore*

- **Product:** Founded and solo-built an AI operating system for SMEs replacing **7 tools**; launched in **10 weeks**
- **AI:** Built LLM agents with tool calling, guardrails and human-in-the-loop approval to stop hallucinations
- **Evals:** Gated autonomous replies on **100% recall** in fabrication evals, with eval suites for adversarial inputs
- **Security:** Multi-tenant row-level security, **91% avg. mutation score**, CI security scans, SOC 2 readiness

Founding Product & AI Engineer (Part-time) Sep 2026 - Present

Influencees *Singapore (Hybrid)*

- Built Ai-kyo, an agentic AI assistant for creators, by orchestrating an intent-routed LLM agent with tool integrations
- Unified 6 messaging channels into one inbox (WhatsApp, Instagram, LinkedIn, TikTok, Gmail and more)
- Cut inbox sign-in lag from 1.1 s to 12 ms by profiling the streaming path

Full-Stack AI Engineer (Intern) Mar 2026 - Present

SP Data Science & Analytics Centre *Singapore*

- Cut retrieval time ~70-85% and manual search ~60% for EM Services with an Azure AI Search RAG chatbot
- Cut Power BI grading time ~50-70% with an LLM grader that scores .pbix dashboards against rubrics

AI Researcher / Developer (Part-time) May 2026 - Aug 2026

PetaniAI *Singapore (Hybrid)*

- Researched and benchmarked new AI models and tools against company needs, then prototyped the top picks

Student Developer Sep 2025 - Feb 2026

Singapore Polytechnic, Department of Communications *Singapore*

- Built LLM-as-a-judge evaluation and guardrails for a RAG chat agent on AWS (paid project)
- Built the full stack; piloted at SP Open House 2026 and presented to SP's Deputy Principal and PCEO

ML PROJECTS

Edge Human Detection | *PyTorch, YOLO11, OpenCV, Docker* 2026

- Fine-tuned YOLO11 on KAIST thermal data for night CCTV, with a precision/recall test harness

Covid-19 X-ray Classifier | *PyTorch* 2026

- 91% test accuracy on 4,233 X-rays (4 classes) with a from-scratch CNN and class-weighted loss

AgentLabs | *PyTorch, PEFT (LoRA), FastAPI* 2026

- LoRA fine-tuning plus adversarial evaluation over 200 attacks with deterministic verifiers (live demo)

HONORS & AWARDS

- **National Olympiad in Artificial Intelligence (NOAI) 2026**: Bronze, top 60 in all of Singapore
- **Projet: Hack & Hire**: Winner
- **OpenClaw Hackathon**: Top 3
- **Agent Forge Hackathon**: 3rd runner-up
- **PolyFinTech 2026 (ESG Category)**: Finalist
- **'SUP Build2026**: Top 3, Best Use of Zo
- **Daytona HackSprint**: 2nd runner-up
- **NAISC (Huawei Track)**: Top 10

TECHNICAL SKILLS

ML / DL	PyTorch, TensorFlow, Keras, scikit-learn, Hugging Face, CNNs, RNNs, YOLO, OpenCV
Evaluation	Precision/recall, F1, MAPE, model benchmarking, LLM-as-a-judge, adversarial testing
Generative AI	LoRA fine-tuning, RAG, embeddings and vector search, agents, prompt engineering
Engineering	Python, SQL, TypeScript, FastAPI, Docker, Azure, AWS, PostgreSQL, GitHub Actions
Certifications	AWS Certified AI Practitioner, Google AI Professional, AI Singapore Certified Trainer
